

**BUSINESS**

**Recycling, Conservation, and Energy Efficiency**

The Board of Trustees recognizes the importance of minimizing the district's impact on the environment. To that end, the Superintendent or designee shall investigate and get involved in recycling programs such as the City of San Jose's "***Go Green***" or strategies such as "***Reduce, Reuse, and Recycle***" to the greatest extent possible and reasonable.

Specifically, the Superintendent or designee will regularly review the status of and maximize efforts to recycle waste materials, achieve energy efficiencies wherever possible, use renewable resources, encourage conservation practices wherever practical and work collaboratively with other community agencies, where possible, in these areas.
