

ADMINISTRATION

School Resources

The Board believes in a well-planned, community-supported educational program for all pupils. In order to maximize pupil learning and to support and implement individual school Improvement plans, it is most important to provide adequate resources.

General Fund and Categorical resources available for use in schools may vary from year to year based on changes in local, state, and federal funding. The staffing needs of schools shall be determined annually. Funding to meet the staffing needs of schools will be increased or decreased as the fiscal conditions of the school district dictate.
