

BUSINESS

District Records

The Governing Board recognizes the importance of securing and retaining district documents. The Superintendent or designee shall ensure that district records are developed, maintained, and disposed of in accordance with law, Board policy, and administrative regulation.

The Superintendent or designee shall consult with district legal counsel, site administrators, district information technology staff, personnel department staff, and others as necessary to develop a secure document management system that provides for the storage, retrieval, archiving, and destruction of district documents, including electronically stored information such as email. This document management system shall be designed to comply with state and federal laws regarding security of records, record retention and destruction, response to "litigation hold" discovery requests, and the recovery of records in the event of a disaster or emergency.

The Superintendent or designee shall ensure the confidentiality of records as required by law and shall establish regulations to safeguard data against damage, loss, or theft.

The Superintendent or designee shall ensure that employees receive information about the district's document management system, including retention and confidentiality requirements and an employee's obligations in the event of a litigation hold established on the advice of legal counsel.

Safe at Home Program

District public records shall not include the actual addresses of students, parents/guardians, or employees when a substitute address is designated by the Secretary of State pursuant to the Safe at Home program. (Government Code 6206, 6207)

When a substitute address card is provided pursuant to this program, the confidential, actual address may be used only to establish district residency requirements for enrollment and for school emergency purposes.

Retention of Electronic Records

The Board recognizes that the use of email and other electronic communication in the workplace has increased tremendously, raising issues with respect to communication, creation of information and systems, and retrieval and storage of electronic records. The Board further acknowledges the District's responsibility to make records available to the public, with certain exceptions. Accordingly, the Board directs that all electronic records of this District be maintained, safeguarded and disclosed in full compliance with the requirements of law.

Access to the District's computers and the District's information and communications systems and equipment is controlled and administered by the District's information technology department. The District has the right to disclose, as permitted or required by applicable law, any communications or records, or copies of communications or records stored for any period of time in or by the District's information and communication system or equipment. The District may monitor or access employee communications made using the District's information and communication systems and equipment and employees should have no expectation of privacy when using the District's information and communications systems and equipment.
