

## **COMMUNITY RELATIONS**

### **Cooperation of School Personnel**

Contact with parents by working together in School Site Councils and in parent-teacher organization conferences and social gatherings provides school personnel opportunities for gaining friendly and intelligent cooperation and input from those most interested in schools and for sampling public opinion. Principals and teachers are expected to assist parents in organizing strong, active, School Site Councils and parent-teacher organizations, and to channel energies of parent-teacher organizations and School Site Councils toward programs mutually beneficial to schools and community.
