

INSTRUCTION

General Policy Statement

In its relationship with the instructional program, the Board hopes to make its greatest contribution to education in our community. The Board sees itself supporting and supplementing the efforts of the faculty in every possible way.

Teachers, administrators, and other instructional personnel need the support of the community. In an ever-changing society, it is important that the community and staff members work together to determine the goals of the education program in order that they may be relevant to the lives of the pupils entrusted to our care.

The Board, being aware that specific educational techniques are the responsibility of the staff, sees its main responsibility to be that of providing the necessary services as may be required to best meet the needs and goals of the Board, staff, and community.

The Board is also aware that our changing society necessitates a continuing reevaluation of our current standards and techniques. The Board pledges itself to develop a continuing program of in-service education for the certificated and classified staff and community.
