

NEW CONSTRUCTION

Building Design

Minimum standards for building design, as specified in the state school laws, shall not be looked upon as limiting factors.

The primary guiding principles in design must be the educational program to be served and the health and safety of pupils. In addition, original cost and long-term maintenance costs must be considered.

The building plans shall reflect these concerns.

Policy

Adopted: January 10, 1974

Revised Policy

Adopted: January, 13, 1983
